

Information security policy

In Iskraemeco we are aware of our responsibilities in providing information security in our work and business with suppliers and customers.

Objectives of information security policy are:

- Ensuring the information security in the process of manufacturing products and providing services to the market,
- Providing quality information treatment of all parties involved in the business operations of the company,
- Handling with information (classified information, personal information, business secret),
- Ensuring business continuity and limitation of operating loss to a minimum by preventing and reducing the consequences of security incidents,
- Ensuring high awareness among all employees about security risks and ways to protect information.

The purpose of the information security policy is to determine the importance of information for business and adequately protected in terms of confidentiality, integrity and availability:

- Confidentiality: ensuring access to information to authorized persons only,
- Integrity: protection of the accuracy and completeness of the information by preventing unauthorized changes,
- Availability: ensuring authorized persons have access to information and associated assets when they need them.
